O. W. CONNER,

Grower of Orange and Grape Fruit Trees,

Both Budded and Grafted on Sour

Orange and Rough Lemon Roots.

Ocklawaha, Florida.

DEAR SIR:

We are now engaged in grafting and budding our fine stock of trees, and would like for you to get your order in for what trees you will need to set the coming season. We have some 50,000 stock, and will bud and graft them to all desirable varieties, and in cases where it is preferred we will insert buds or grafts from our customers' own trees, and they will in that way be sure of getting exactly what they want, both as to variety and grade of tree. By grafting we can assure you that your trees will in every way be fully equal to a two-year-old bud, and its bearing qualities unrivaled—in fact, unequalled. We have on hand some 20,000 5-year-old stock that we are now engaged in grafting, both sour orange and rough lemon, and it is on this stock that we will make our largest trees. We will be glad to make you prices on stock for full delivery, and assure you that our trees will in every way be equal to those of last season, and will represent more varieties. We felt short several thousand on grape fruit and tangerines, but we will be prepared to meet all demands for those two varieties this season, as we will graft and bud them on a large scale. Hoping to hear from you at an early date, as we feel sure that only those getting in their orders early will be sure that they will get what they want, we remain, Yours Very Truly, OCKLAWAHA NURSERY.
